- Worked on Search Api and reduced the service response time to 300ms by optimizing the redundant code.
- Transferring PHP apis to node.js involves writing web services in node.js with graphql. Integrated Voice search across platform and varnish caching as well
- Migrated Indiamart's home page from PHP to JavaScript PWA using React, Redux, Webpack, Node in order to Work Experience provide faster page load and developed buylead module.
- Developed Service worker for PWA to enable caching to improve the page load time.

Tools And Technologies Used: PHP Yii Framework, Node.js, React.js, Java 5, Zabbix, New Relic, Nginx, Service Worker, Webpack, GraphQL

## WORK EXPERIENCE

---

### Software Developer Intern R Systems Private Limited

06/2016 – 08/2016

Noida

*R Systems' mission is to enable digital innovation for enterprises in the Finance*

*Achievements/Tasks*

- During this internship we worked upon the development of "Intranet Chat System" which is to be used by R Systems employees.
- This project was based on Servlet and this is just the gmail where all employee would have their id and they will communicate on it via ping and by mail.

### Web Developer Intern Kareer Matrix

08/2015 – 11/2015

Noida

*KareerMatrix, a Digital Platform for resolving the recruitment frustration through technologies, like Video Interview, Skill Assessment tool.*

*Tasks/Achievements*

- During this internship we worked upon the development of "Greenfence" website portal.
- This project was based on Spring and Hybernate. This is a vast project and it took about 6 months to complete the website development.

## PERSONAL PROJECTS

---

### Spring CRM (06/2019 – Present) [↗](#)

- Create And Manage Customer at a Shop
- Searching For Customers
- Creating Roles and Access Rights

### React Chat Messenger App (09/2017 – 10/2017) [↗](#)

- This is a react app that deals with transfer of messages between two users. This app is built on socket.io where two sockets were being made and messages were being transferred by maintaining state. This app provides real time messaging service similar to whatsapp

### Final Year Project (Hand Written Character Recognition System) (06/2016 – 03/2017)

- This Project is based on machine learning where the system is first made to learn the various datasets that are entered into the .db file.
- After that at the time of recognition the hand written character entered by the user and then that image is being compared by taking the dot product and the most optimal result is sent out.

### Gohelper App (03/2017 – 06/2017) [↗](#)

- This is an android app that I have built while doing my internship at gohelper. This app provides services such as plumbers, Mechanic Or any other services like Gardener, Pest control for the customers.

## EDUCATION

---

### Bachelor Of Technology (Computer Science And Engineering) Jss Academy of Technical Education

08/2013 – 06/2017

Noida

*Courses*

- B-tech percentage: 81.2%
